

HeartCheck™ CardiBeat

Handheld ECG Monitor
Powered by CardioComm Solutions, Inc.

The HeartCheck™ CardiBeat Cardiac Event Monitor

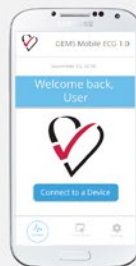

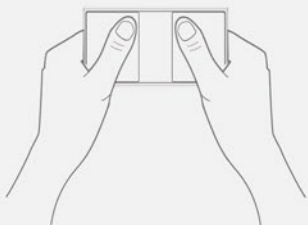

Capture Lead I or II heart rhythm recordings.

Connect to a smart device with the GEMS™ Mobile App via Bluetooth to import ECG recordings.

Transmit ECGs to a physician, clinic or the SMART monitoring ECG reading service or generate your own ECG record in PDF format to show to your physician.

Available OTC the HeartCheck™ CardiBeat allows a user to record a medical grade 30 second single lead ECG. Coupled with the GEMS™ Mobile App a user can save up to a five minute recording from the device. Specific symptom, activity and diary entry information related to the recording can be entered and sent for a review by a physician, clinic or the SMART monitoring ECG reading service.

Capable of fitting into multiple clinic and telemedicine workflows, the HeartCheck™ CardiBeat with the GEMS™ Mobile App is an ideal tool for remote patient monitoring in today's ever expanding telemedicine market.
