

HeartCheckTM CardiBeat

Handheld ECG Monitor

Powered by CardioComm Solutions, Inc.

QUICK START GUIDE

Get GEMSTM Mobile ECG

Setup your user
and verify your
email address

Connect & Record your ECG

— Bluetooth —

MORE →

App Install - GEMS™ Mobile ECG is available through the Google Play Store and the Apple App Store. Install the GEMS™ Mobile ECG App on your smart device and launch the application. Create a new user and verify your email address.

Connecting - Ensure Bluetooth is enabled on your smart device. Select *Connect to a Device* button on the welcome screen; then select the HeartCheck™ CardiBeat from the list of devices and press the *Connect* button. Hold the CardiBeat as shown to activate it.

Recording - GEMS™ Mobile ECG will begin recording after connecting to the device. The screen will show a countdown of 30 seconds while it records however an ECG trace will not be visible on first use.

Add a diary entry at the end of recording (symptoms and activity), then upload for a free physician review to unlock ECG viewing.
